PROFESSIONAL PROFILE

Dynamic data analyst and technical problem-solver with extensive experience in healthcare operations, analytics, and process optimization. Skilled in transforming complex data into clear, actionable insights and developing scalable reporting solutions that support strategic decision-making. Known for strong analytical thinking, collaborative communication, and the ability to manage projects from concept through delivery. Adept at dashboard development, data quality improvement, and cross-functional coordination, with growing expertise in web development and programming including JavaScript, HTML/CSS and Java.

PROFESSIONAL EXPERIENCE

Optum – UnitedHealthcare

January 2005 – Current

Data Analyst 2

OptumRx || Maryland Heights, MO || 2024 – present

Data Analyst supporting the Government Program Operations Performance Analytics team, specializing in EGWP and M3P trend analysis, dashboard development, and operational performance insights.

- Serve as Power BI / Fabric Team Workspace Owner, overseeing environment organization, access, and governance.
- Deliver the EGWP SLA Dashboard enabling verification of Convey-reported metrics and accurate invoice balancing.
- Build the M3P Pharmacy Helpdesk Outreach Program dashboard to identify enrollment barriers and target pharmacy outreach.
- Streamline daily stand-ups and lead biweekly calls to surface roadblocks, track progress, and support leadership reporting.
- Provide backup business analyst support, including requirements gathering and process documentation.
- Develop and enhance operational tools to improve production efficiency and reduce manual workload.
- Produce ad hoc analyses and reporting to support leadership decision-making.
- Translate complex datasets into clear, actionable insights for technical and non-technical stakeholders.
- Design and implement data transformations that meet business requirements and technical constraints.
- Troubleshoot, maintain, and optimize data solutions using diagnostic tools and established processes.
- Assist in building and managing data pipelines to support reporting and analytics integration.
- Detect data quality issues, identify root causes, implement fixes, and manage data audits.
- Collaborate with cross-functional teams and leadership to support operational goals and continuous improvement.

EXPERIENCE c o n t i n u e d ...

Senior Tech Project Manager / Senior Business Process Analyst

Optum || Maryland Heights, MO || 2020 – 2024

Scrum Master and reporting lead for Payment Integrity's Edit Solutioning & Automation Team, managing deployments across five claim platforms and ensuring accuracy of MCS, revenue, FTE, and SG&A reporting.

- Drove \$539M in 2023 savings by overseeing 285 projects and 597 maintenance items, achieving a <4-week Time-to-Value.
- Led OSAM compliance training and governance, reducing documentation errors by 64%.
- Directed the Jira server-to-cloud migration, including interface rebuild and seamless transition of 270 active projects across three lines of business.
- Managed OneART/EAA Jira governance, aligning data across Payment Integrity and providing executive-level visibility into project and financial performance.
- Administered SharePoint sites and security; developed Pended Trans Resubmission reporting for 190+ Automation Resolution Utilities.

Associate Reporting Analyst

Optum || Maryland Heights, MO || 2016 – 2019

- Built executive-level PowerPoint decks and recurring performance reports for leadership.
- Delivered daily-monthly reporting supporting trend analysis, performance insights, and ad hoc needs.
- Managed Weekly Scorecard distribution and redesigned reports to meet evolving business requirements.
- Led biweekly meetings and maintained WIP reporting to support inventory oversight.
